Amendment description

The licence holder has requested an amendment to move a surface water sampling point due to the expansion of mining activities. This Amendment Notice will update the sampling points map in Schedule 1. No additional information is required as the proposed sampling location is within the premises boundary.

The moving of the sample point is due to the extension of the quarry in a northerly direction, which in turn has intersected the drain where sample point "L1" has been. Hanson has re-directed the drain around the operations and subsequently moved sample point "L1". The premises is a disturbed pasture with occasional paddock trees. No vegetation was removed during the re-direction of the drain and there has been no alteration of emissions into the environment.
