Dear [Redacted] Outside Scope

BIO-ORGANICS COMPOSTING FACILITY: LICENCE NUMBER 7770/5

I confirm a proposal was received on 19 June 2006, regarding the incorporation of Print Black Wash into the compost at the Bio-Organics Facility.

Department of Environment and Conservation (DEC) was present at the facility on 4 July 2006, during the receipt of around one cubic meter of Print Black Wash. You are hereby advised that the use of the Print Black Wash in the composting process is regarded as acceptable subject to the following commitments:

- all material received is discharged directly into the green waste windrows;
- maximum air porosity in the blend is maintained to minimise odours;
- no ponding or spillage of Print Black Wash occurs beside the missing area; and
- testing of the compost that has had the Print Black Wash incorporated to ensure it meets the Australian standard for compost A4454:1999.

The Department also requires that community consultation continue with the adjacent neighbours and interested stakeholders. A record of the type and level of community consultation should be retained on site.

Should the DEC or Bio-Organics employees deem odours, as a result of the incorporation of the Print Black Wash material, to be unacceptable then its use should immediately cease.

Please note that the above does not override any other statutory approvals that you are required to obtain, such as any approvals from the Shire of Serpentine-Jarrahdale. Transport of the waste to your facility will require permitting under the Controlled Waste Regulations, you can contact this section on 6364 6979.

This approval in no way constitutes any endorsement by the DoE of any compost produced using the Print Black Wash material. Any commercial implications of this practice are entirely your company's responsibility.
