

Couple of points raised by Elizabeth below for consideration in the Application Form.

- Overall positive feedback on the form and approach. Considered that it was much more effective and efficient approach.
- Fitness and Competency – similar comments that we have already received from industry re: scope and director
- Section 6 – Public Health and Environmental Risks – Ability to quantify type and quantity for fugitive emissions.
- Instruction around clearing
- There is no checked boxes

Other related points raised:

- Approach to licence amendments applications
- Managing the transition period regarding works approval (approved) and licence applications. I did discuss the view towards single application with concurrent assessment.

Hi there,

I'm attempting to complete the new application form in order to obtain a Prescribed Premises Licence (Works Approval already completed) for mine dewatering activities. I have a few questions, is it possible to give someone a call who is a full bottle on the new form?

Kind Regards,

**Elizabeth von Perger**
