Application form: Works Approval / Licence / Renewal / Amendment / Registration

Part V Division 3. Environmental Protection Act 1986
Environmental Protection Regulations 1987

Part 1: Application type

INSTRUCTIONS:

- Completion of this form is a statutory requirement under s.54(1)(a) of the Environmental Protection Act 1986 (WA) (EP Act) for works approval applications; s.57(1)(a) for licence and licence renewal applications; s.59B(1)(a) for applications for an amendment; and under r.5B(2)(a) of the Environmental Protection Regulations 1987 (WA) (EP Regulations) for applications for registration of premises.
- · The instructions set out in this application form are general in nature.
- · A reference to 'you' in these instructions is a reference to the applicant.
- The information provided to you by the Department of Water and Environmental Regulation (DWER) in relation to making applications does not constitute legal advice. DWER recommends that you obtain independent legal advice.
- Applicants seeking further information relating to requirements under the EP Act and/or EP Regulations
 are directed to the Parliamentary Counsel's Office website (www.legislation.wa.gov.au). Schedule 1 of the
 EP Regulations contains the categories of prescribed premises.
- For prescribed premises where activities fall within more than one category, ALL applicable categories
 must be identified. This applies for existing prescribed premises seeking renewal or amendment, as well
 as new prescribed premises.
- The application form must be completed with all relevant information attached. Attachments can be
 combined and submitted as one or more consolidated documents if desired, provided it is clear which
 section of the application form the information / attachments relate to. Where attachments are submitted
 separately, avoid duplicating information. Ensure that any cross-references between the application form
 and the supporting document(s) are accurate.
- If an application form has been submitted which is incomplete or materially incorrect, the Chief Executive
 Officer of DWER (CEO) will decline to deal with the application and advise the applicant accordingly.

	n completing this application form, please s e form.	ubmit it to DWER in line with the instructions in Part 15 of
1.1	This is an application for: [Select one option only. Your application may be returned if multiple options are selected.] under Part V. Division 3 of the EP Act. Please see the: • Guideline: Industry Regulation Guide to Licensing • Procedure: Prescribed premises works approvals and licences for more information to assist in understanding DWER's regulatory regime for prescribed premises.	 □ Works approval □ Licence Existing registration number(s): [] Existing works approval number(s): [W6921/2024/1] □ Renewal Existing licence number: [] □ Amendment Number of the existing licence or works approval to be amended: [] □ Registration (works approval already obtained) Existing works approval number(s): []
1.2	days until the expiry of the existing work. Only active instruments can be amended. A	pplications to amend a works approval or licence or to the existing works approval or licence expiring
1.3	This application is for the following categories of prescribed premises: (specify all prescribed premises category numbers)	[Category 61: Liquid Waste Facility]
		All activities that meet the definition of a prescribed premises as set out in Schedule 1 of the EP Regulations have been specified above (tick, if yes).

Part 2: Applicant details

INSTRUCTIONS:

- The applicant (the occupier of the premises) must be an individual(s), a company, body corporate, or
 public authority, but not a partnership, trust, or joint-venture name. Applications made by or on behalf of
 business names or unincorporated associations will not be accepted.
- If applying as an individual, your full legal name must be provided.
- If applying as a company, body corporate, or public authority, the full legal entity name must be inserted.
- Australian Company Number's (ACN) must be provided for all companies or body corporates.
- DWER prefers to send all correspondence electronically via email. We request that you consent to receiving all correspondence relating to instruments and notices under Part V of the EP Act (Part V documents) electronically via email, by indicating your consent in Section 2.3.
- Companies or body corporates making an application must nominate an authorised representative from within their organisation. Proof of authorisation must be submitted with the application (see Section 2.10). If you are applying as an individual, you are the representative.
- Details of a contact person must be provided for DWER enquiries in relation to your application. This
 contact person can be a consultant if authorised to represent the applicant. Written evidence of this
 authorisation must be provided.
- Details of the occupier of the premises must be provided. One of the options must be selected and if you
 have been asked to specify, please provide details. For example, if 'lease holder' has been selected,
 please specify the type of lease (for example, pastoral lease, mining lease, or general lease) and provide a
 copy of the lease document(s). Note that contracts for sale of land will not be sufficient evidence of
 occupancy status.

2.1	Applicant name/s (full legal name/s): The proposed holder of the works approval, licence or registration.	Aquila Holdings (WA) Pty Ltd		
	ACN (if applicable):	659 814 276		
2.2	Trading as (if applicable):	Vac West Industrial		
2.3	Authorised representative details:	Name		
	The person authorised to receive correspondence and Part V documents on behalf of the applicant under the EP Act.	Position		
	Where 'yes' is selected, all correspondence will be sent to you via email, to the email	Telephone		
	address provided in this section.	Email		
	Where 'no' has been selected, Part V documents will be posted to you in hard copy to the postal / business address specified in Section 2.4, below. Other general correspondence may still be sent to you via email.	I consent to all written correspondence between myself (the applicant) and DWER, regarding the subject of this application, being exclusively via email, using the email address I have provided above.	Yes	No 🗆
2.4	Registered office address, as registered with the Australian Securities and Investments Commission (ASIC): This must be a physical address to which a Part V document may be delivered.	41 Foskew Way Narngulu WA 6532		
2.5	Postal address for all other correspondence: If different from Section 2.4.

Part 4: Proposed activities

INSTRUCTIONS:

- You must provide a description and the scope, size and scale of all prescribed activities of Schedule 1 to the EP Regulations including the maximum production or design capacity of each prescribed activity.
- If applying for a works approval or licence amendment involving the construction of new infrastructure, you must provide information on infrastructure to be constructed and how long construction is expected to take. You must confirm if commissioning is to occur and how long it will take.
- If applying for a works approval or licence amendment not involving the construction of new infrastructure, provide details of the proposed amendment.
- · You must identify all emission sources on the premises map/s.
- You must also provide information on activities which directly relate to the prescribed premises category
 which have, or are likely to result in, an emission or discharge.
- If clearing activities are proposed provide a description and details. If a relevant exemption under Schedule 6 of the EP Act or r.5 of the Environmental Protection (Clearing of Native Vegetation) Regulations 2004 (WA) (Clearing Regulations) may apply, provide details.
- Note that in some cases, DWER may require that the clearing components of a works approval or licence (or amendment) application be submitted separately through the clearing permit application process.
 Refer to the <u>Procedure: Prescribed premises works approvals and licences</u> for further guidance.
- Please note that the requested information is critical to DWER's understanding of the proposed activities.
 The more accurate, specific, and complete the information provided in the application, the less uncertainty that DWER may identify in the application, therefore facilitating completion of the assessment in a more efficient and timely manner.

4.1 Prescribed premises infrastructure and equipment

In Table 4.1 (below), provide a list of all items of infrastructure and equipment within the boundary of the prescribed premises relevant to this application, and include the following details for each:

- relevant categories (if known) the categories of prescribed premises (as listed under Schedule 1
 of the EP Regulations) that relate to that infrastructure or equipment;
- site plan reference the location of that infrastructure or equipment (with reference to the site plan
 map or maps provided above in Section 3.4 and labelled as Attachment 2 e.g. use GPS
 coordinates or a clear description such as "labelled as [label on premises map] on Map A");
- is it critical containment infrastructure (CCI)? indicate if the identified infrastructure or
 equipment would be categorised as CCI. Refer to the <u>Guideline: Industry Regulation Guide to</u>
 <u>Licensing</u> for further information on CCI; and
- is environmental commissioning required? indicate if environmental commissioning is intended
 to be undertaken for that item of infrastructure or equipment. Refer to the <u>Guideline: Industry</u>
 Regulation <u>Guide to Licensing</u> for further information on environmental commissioning.

Add additional rows to Table 4.1 (below) as required.

Table 4.1: Infrastructure and equipment

Part 4: Proposed activities

4.2 Detailed description of proposed activities or proposed changes (if an amendment):

You must provide details of proposed activities relevant to this application within the boundary of the prescribed premises, identifying:

- scope, size, and scale of the project, including details as to production or design capacity (and/or frequency, if applicable);
- key infrastructure and equipment;
- description of processes or operations (a process flow chart may be included as an attachment);
- emission / discharge points;
- locations of waste storage or disposal
- activities occurring during construction, environmental commissioning, and operation (if applicable).

If assessment and imposition of conditions to allow environmental commissioning to be undertaken are requested, please provide an environmental commissioning plan as Attachment 3A (see 4.11 below). Additional information relating to the proposed activities may be included in Attachment 3B (see 4.12 below).

Construction activities (if applicable):

Addition of stand alone third tank in bunded area

Environmental commissioning activities (if applicable):

Refer to the Guideline: Industry Regulation Guide to Licensing for further guidance.

Time limited operations activities (if applicable):

Different elements of the premises may require time limited operations to commence at different times. In these circumstances, please specify the infrastructure and/or equipment for which time limited operations authorisation is being applied for.

If time limited operations are expected to differ from future licensed operations, specify how and why this would be the case.

Refer to the Guideline: Industry Regulation Guide to Licensing for further guidance.

Operations activities (for a licence):

Storage of L150 industrial wash water on our premises.

- 4.3 Estimated operating period of the project / premises (e.g. based on 5 years estimated infrastructure life):
- 4.4 Proposed date(s) for commencement of works (if applicable):
- 4.5 Proposed date(s) for conclusion of works construction (if applicable):

This date should coincide with the submission to DWER of an Environmental Compliance Report(s) and/or a Critical Containment Infrastructure Report(s) as required.

Refer to the Guideline: Industry Regulation Guide to Licensing.

4.6 Proposed date(s) for environmental commissioning of works (if applicable):

Refer to the Guideline: Industry Regulation Guide to Licensing.

4.7 Proposed date/s for commencement of time limited operations under works approval (if applicable):

Refer to the Guideline: Industry Regulation Guide to Licensing.

4.8 Maximum production or design capacity for each category applied for (based on infrastructure operating 24 hours a day, 7 days a

2,000 tonne per year

week):

Provide figures for all categories listed in Section 1.2.

Part 4	Proposed activities			
		nust be the same as the units of measurement vant category as identified in Schedule 1 of the		
4.9	Provide figures for all ca Units of measurement n	bughput for each category applied for: 1,200 tonner ategories listed in Section 1.2. nust be the same as the units of measurement vant category as identified in Schedule 1 of the	per year

4.10	Attachment 2: Premises map	Emission/discharge points are clearly labelled on the map/s required for Part 3.4 (Attachment 2).		
4.11	Attachment 3A: Environmental commissioning plan	If applying to construct works or install equipment, and environmental commissioning of the works or equipment is planned, an environmental commissioning plan has been included in Attachment 3A.	×	
		The environmental commissioning plan is expected to include at minimum, identification of:	ie,	
		 the sequence of commissioning activities to be undertaken, including details on whether they will the done in stages; 	e e	
		 a summary of the timeframes associated with the identified sequence of commissioning activities; 		
		 the inputs and outputs that will be used in the commissioning process; 		
		 the emissions and/or discharges expected to occur during commissioning; 		
		 the emissions and/or discharges that will be monitored and/or confirmed to establish or test a steady-state operation (e.g. identifying emissions surrogates, etc.), including a detailed emissions monitoring program for the measurement of those emissions and/or discharges; 		
		 the controls (including management actions) that v be put in place to address the expected emissions and/or discharges; 		
		 any contingency plans for if emissions exceedance or unplanned emissions and/or discharges occur 	s	
		 how any of the above would differ from standard operations once commissioning is complete. 		
		Note that DWER will not include conditions on a granted instrument that authorise environmental commissioning activities where it is not satisfied that the risks associated we environmental commissioning can be adequately addressed.

	The potential for emissions should be considered for all stages of the proposal (where reincluding during construction, commissioning and operation of the premises.	levant),	
		No	Yes
9.1	including during construction, commissioning and operation of the premises.		Y

☐ Gaseous and particulate emissions (e.g. emissions from stacks, chimneys or baghouses)	☐ Dust (e.g. from equipment, unsealed roads and/or stockpiles, etc.)
☐ Wastewater discharges (e.g. treated sewage, wash water, or process water discharged to lands or waters)	☑ Waste and leachate (e.g. emissions through seepage, leaks and spills of waste from storage, process and handling areas, etc.)
☐ Noise (e.g. from machinery operations and/or vehicle operations)	Odour (e.g. from wastes accepted at putrescible landfills, storage or processing of waste or other odorous materials, etc.)
Contaminated or potentially contaminated stormwater (e.g. stormwater with the potential to come into contact with chemicals or waste materials, etc.)	☐ Electromagnetic radiation¹
Other (please specify): [1
Note that for electromagnetic radiation, copies/details of Mines, Industry Regulation and Safety or the Radiological	other relevant approvals (such as from the Department of Council) must be provided where applicable.

Details of any pollution control equipment or waste treatment system, including any control mechanisms used to ensure proper operation of this equipment, must be included in the proposed controls column of the 'Emissions and discharges table' below. Details of management measures employed to control emissions should also be included. Please provide / attach any relevant documents (e.g. management plans, etc.). Additional rows may be added as required and/or further information may be included as an attachment (see Section 9.3).

Table 9.1: Emissions and discharges

	Source of emission or discharge	Emission or discharge type	Volume and frequency	Proposed controls (include in Attachment 6A if extensive or complex)	Location (on site layout plan - see 3.4)
1.	Vehicle and/or machinery movement on unsealed road during tank installation	Dust		Reduce speed limit. Tank is prefabricated with minor works to install and connect.	
2.	Vehicle and/or machinery movement during tank installation	Noise		Premises is located in an industrial area. Tank is prefabricated with minor works to install and connect.	
3.	Vacuum truck/ vehicle movement on unsealed road	Dust		Reduce speed limit.	
				The tanks will be installed upon a HDPE liner. The tanks will be constructed to Australian Standard AS4766:2066 and the walls strengthened to a rating of 1.2. There will be impermeable bunding set up on all sides of the tanks with a pump and pipework to divert water from leaks/overflow to the wash	
4,	Leaks and spillage from transfer of water from truck to	Waste and leachate		down pad and slipway. The existing wash down pad is impermeable, bunded and drains to the slipway. The existing slipway is impermeable, bunded and drains to a blind sump.	Bunded Area, Tank, Wash Pad
	storage tanks			When the slipway overfills it flows back up and onto the wash down pad. The wash down pad and slipway have a combined capacity of approximately 32,500L.	
				There will be a spill tray at each connection to catch any drips during connection / disconnection.	
				The tanks will remain coupled to the manifold at all times during loading and unloading. The manifold will have a check valve fitted.	

			The tanks will have 3-inch				
			butterfly taps on the outlet, along with a backup double isolated camlock cap.				
			There will be a full spill kit available on the wash down				
			pad. Connection to the truck will				
			be carried out upon the wash down pad, which runs into a secured slipway should there be a mishap.				
5.	Overflow from storage tanks	Waste and leachate	The tanks are pre-installed with level gauges for monitoring by the manufacturer.

10.1 Sensitive land uses What is/are the distance(s) to the nearest sensitive land use(s)? A sensitive land use is a residence or other land use which may be affected by an emission or discharge associated with the proposed activities. Narngulu Industrial Estate where the premise is located is surrounded by commercial properties. The nearest sensitive land use is residences located 1,439.7m from the premise.

10.2 Nearby environmentally sensitive receptors and aspects

Identify in Table 10.2 (below):

- all instances of environmentally sensitive receptors that are known or suspected to be present within, or within close proximity to, the proposed prescribed premises boundary;
- the nature of the sensitive receptors (e.g. type of Threatened Ecological Community, species or threatened flora or fauna, etc.);
- their actual or approximate known distance and direction from the premises boundary (at the closest point/s); and
- if applicable, what measures have been or will be taken to ensure that sensitive receptors are not
 adversely impacted by any emissions or discharges from the premises.

Refer to the Guideline: Environmental siting for further guidance.

Table 10.2: Nearby environmentally sensitive receptors and aspects

Type / classification	Description	Distance + direction to premises boundary	Proposed controls to prevent or mitigate adverse impacts (if applicable)

Attachments			N/A	Yes
12.1	Attachment 9: Category	DWER has developed category checklists to assist applicants with preparing their application.	\boxtimes	
	checklist(s)	These checklists are available on DWER's website . The relevant category-specific checklist(s) must be completed and included with the application, labelled as Attachment 9. If attaching multiple category checklists, label them 9A, 9B, etc.		
		Do not select "N/A" unless:		
		the application is for an amendment that does not propose changes to the method of operation, or change the inputs, outputs, infrastructure, equipment, emissions, or discharges of / from the premises.		
		Note that that a category checklist(s) may still be required for renewal applications. You will be advised in your renewal notification letter (sent approximately twelve months before the licence expiry date) if you are required to provide the information identified in a category checklist.		
		Where a category checklist is submitted, please specify which checklist(s) in the space below.		

Part 12: Category checklist(s)

List title(s) of category checklists attached:

Part 13: Proposed fee calculation INSTRUCTIONS: Please calculate the prescribed fee using the relevant online fee calculator linked below. Licence: www.der.wa.gov.au/LicenceFeeCalculator Works approval: www.der.wa.gov.au/WorksApprovalFeeCalculator Amendment: https://www.wa.gov.au/government/publications/works-approval-and-licenceamendment-fee-calculator Different fee units apply for different fee components. Fee units may also have different amounts depending on the period in which the calculation is made. Once DWER has confirmed that the application submitted meets the relevant requirements of the EP Act, you will be issued an invoice with instructions for paying your application fee. Further information on fees can be found in the Fact Sheet: Industry Regulation fees, and on DWER's website. Only the relevant fee calculations are to be completed 13.1 Section 13.3 for works approval applications as follows: Section 13.4 for licence / renewal applications [mark the box to indicate sections completed] Section 13.5 for registration applications ☐ Section 13.6 for amendment applications Section 13.7 for applications requiring clearing of native vegetation All information and data used for the calculation of proposed fees has been provided in 13.2 \times accordance with Section 13.8. 13.3 Proposed works approval fee Proposed works approval fee (see Schedule 3 of the EP Regulations) Fees relate to the cost of the works, including all capital costs (inclusive of GST) associated with the construction and establishment of the works proposed under the works approval application. This includes, for example, costs associated with earth works, hard stands, drainage, plant hire, equipment, processing plant, relocation of equipment and labour hire. Costs exclude: - the cost of land - the cost of buildings to be used for purposes unrelated to the purposes in respect of which the premises are, or will become, prescribed premises - costs for buildings unrelated to the prescribed premises activity or activities

- consultancy fees relating to the works.

Fee component	Proposed fee

13.4 Proposed licence fee (new licences and licence renewals)

Detailed licence fee calculations

Part 1 Premises component (see r.5D and Part 1 of Schedule 4 of the EP Regulations)

The production or design capacity should be the maximum capacity of the premises. For most categories, the production or design capacity refers to an annual rate. The figure should be based on 24 hour operation for 365 days, unless there is another regulatory approval or technical reason that restricts operation.

The premises component fee applies to the category in Part 1, Schedule 4 incurring the higher or highest amount of fee units in accordance with r.5D(2) of the EP Regulations.

List all categories (insert additional rows as required). Use only the higher or highest amount of fee units to determine the Part 1 fee component.

Category	Production or design capacity	Fee units
61 - Liquid Waste Facility	More than 100 but not more than 10 000 tonnes per year	
Using the higher or highest amo	unt of fee units, Part 1 component subtotal	

Part 2 Waste (see r.5D(1a)(b) and Part 2 of Schedule 4 of the EP Regulations)

If your premises includes one or more of the following categories specify any applicable Part 2 waste amounts. Do not include Part 3 waste components of these discharges in the below calculations.

Categories: 5, 6, 7, 8, 9, 12, 14, 44, 46, 53, 54A, 70, 80, or 85B

Part 2 waste means waste consisting of -

- (a) tailings; or
- (b) bitterns; or
- (c) water to allow mining of ore; or
- (d) flyash; or
- (e) waste water from a desalination plant.

If the premises does not fall into one of the categories listed above, or there are no applicable Part 2 waste amounts, the sub total for this section will be \$0.

Insert additional rows as required. Sum all Part 2 waste fees to determine the sub total.

Discharge quantity (tonnes/year)	Fee units	
Part 2 component subtotal	\$0	

Part 3 Waste - Discharges to air, onto land, into waters (see Part 3 of Schedule 4 of the EP Regulations)

Choose the appropriate location of the discharge and enter the discharge amount(s) in the units specified in the EP Regulations. This should be the amount of waste expected to be discharged over the next 12 months, expressed in the units and averaging period applicable for that waste kind (for example, g/minute or kg/day). Amounts can be measured, calculated, or estimated and can be based on data acquired over the previous 12 months, but should be based on the maximum premises capacity and not the forecast operating hours.

Where there are discharges, all prescribed waste types must be considered in the fee calculation. If a specified waste type is not present in the discharge, this must be justified using an appropriate emission estimation technique (for example, sampling data, industry sector guidance notes, National Pollution Inventory guides and emission factors).

Discharges to air		D: 1
Discharges to air Discharge rate (g/min)	Discharges to air	Discharge rate (g/min)
Carbon monoxide	Nickel	
Oxides of nitrogen	Vanadium	11.0
Sulphur oxides	Zinc	
Particulates (Total PM)	Vinyl chloride	
Volatile organic compounds	Hydrogen sulphide	
Inorganic fluoride	Benzene	
Pesticides	Carbon oxysulphide	
Aluminium	Carbon disulphide	
Arsenic	Acrylates	
Chromium	Beryllium	
Cobalt	Cadmium	
Copper	Mercury	61
Lead	TDI (toluene-2, 4-di-iso-cyanate)	
Manganese	MDI (diphenyl-methane di-iso-cyanate)	
Molybdenum	Other waste	
Part 3 component subtotal	\$0	
Discharges onto land or into waters		Discharge rate
Liquid waste that can potentially deprive receiving waters of oxygen (for each kilogram discharged per day) —	(a) biochemical oxygen demand (in the absence of chemical oxygen demand limit)	y
	(b) chemical oxygen demand (in the absence of total organic carbon limit)	
	(c) total organic carbon	
2. Bio-stimulants (for each kilogram discharged	(a) phosphorus	
per day) —	(b) total nitrogen	
Liquid waste that physically alters the characteristics of naturally occurring waters —	(a) total suspended solids (for each kilogram discharged per day)	
	(b) surfactants (for each kilogram discharged per day)	
	(c) colour alteration (for each platinum cobalt unit of colour above the ambient colour of the waters in each megalitre discharged per day)	
	(d) temperature alteration (for each 1°C above the ambient temperature of the waters in each megalitre discharged per day) —	Š
	(i) in the sea south of the Tropic of Capricorn	
	(ii) in other waters	

4. Waste that can potentially accumulate	(a) aluminium	
in the environment or living tissue (for each kilogram discharged per day) —	(b) arsenic	
	(c) cadmium	
	(d) chromium	
	(e) cobalt	
	(f) copper	
	(g) lead	
	(h) mercury	
	(i) molybdenum	
	(j) nickel	
	(k) vanadium	
	(I) zinc	
	(m)pesticides	
	(n) fish tainting wastes	
	(o) manganese	
5. E. coli bacteria as indicator species (in	(a) 1,000 to 5,000 organisms per 100 ml	
each megalitre discharged per day) —	(b) 5,000 to 20,000 organisms per 100 ml	
	(c) more than 20,000 organisms per 100 ml	
6. Other waste (per kilogram discharged	(a) oil and grease	
per day) —	(b) total dissolved solids	
	(c) fluoride	
	(d) iron	
	(e) total residual chlorine	
	(f) other	
Part 3 component subtotal \$ 0		
Summary – Proposed licence fee		
Part 1 Component		
Part 2 Component		
Part 3 Component		
Total proposed licence fees:		
13.5 Prescribed fee for registration		
A fee of 24 units applies for an application fo occupier of the premises holds a licence in reaccordance with r.5B(2)(c) of the EP Regulat	espect of the premises, in	

13.6 Amendment fee (works approval or licence	1:	3.6	Amendment f	ee (wo	orks appr	oval or	licence
---	----	-----	-------------	--------	-----------	---------	---------

The fee prescribed for an application for an amendment to a works approval or licence is calculated in accordance with r.5BB(1)(a) of the EP Regulations:

- for a single category of prescribed premises to which the works approval or licence relates, by using the fee
 unit number corresponding to the prescribed premises category and relevant design capacity threshold in
 Schedule 4 Part 1 of the EP Regulations.
- for multiple categories of prescribed premises to which the works approval or licence relates, by using the
 highest fee unit number corresponding to the prescribed premises categories and design capacity threshold
 in Schedule 4 Part 1 of the EP Regulations.

Fee Unit	s Proposed fee			
	\$			
13.7	Prescribed fee for clearing permit			
Procedur vegetatio DWER m of the applican applican permit un Note: If a by DWEF DWER de	ance with the <u>Guideline: Industry Regulation Guide to Licensing</u> and <u>e: Native vegetation clearing permits</u> , where approval to clear native in is sought as part of an application for a works approval or licence, ay elect to either jointly or separately determine the clearing component plication. Where DWER separately determines the clearing component of ation, the application will be deemed to be an application for a clearing der s.51E of the EP Act and processed accordingly. clearing permit application has been separately submitted and accepted R, a refund for the clearing permit application will not be provided where etermines to address clearing requirements as part of a related works application.	☐ (Tick to acknowledge)

Part 14: Commercially sensitive or confidential information

NOTE:

Information submitted as part of this application will be made publicly available. If you wish to submit commercially sensitive or confidential information, please identify the information in Attachment 11, and include a written statement of reasons why you request each item of information be kept confidential.

Information submitted later in the application process may also be made publicly available at DWER's discretion. For any commercially sensitive or confidential information, please follow the same process as described above.

DWER will take reasonable steps to protect genuinely confidential or commercially sensitive information. However, please note that DWER cannot commit to redacting all personal information from all supporting documents. You are advised to ensure that all personal information, including signatures, are removed from supporting documents prior to submitting them to the department. Please note that all submitted information may be the subject of an application for release under the Freedom of Information Act 1992.

All information which you would propose to be exempt from public disclosure has been separately placed in a redacted version of the application form and its supporting	Attached	N/A
documentation. Note that this is in addition to the unredacted version(s) provided to DWER for its assessment. Grounds for claiming exemption in accordance with Schedule 1 to the Freedom of Information Act 1992 must be specified in Attachment 11 (located at the end of this form).		

Part 15: Submission of application	
INSTRUCTIONS: Check one of the boxes below to nominate how you will submit your application. Files larger than 50MB cannot be received via email by DWER. Files larger than 50MB can be sent via File Transfer. Alternatively, email DWER to make other arrangements.	le
A full, signed, electronic copy of the application form including all attachments has been submitted via email to info@dwer.wa gov.au; OR	\boxtimes
