

**APPROVAL FOR MINING PROPOSAL - MT CHARLOTTE LITTLE WONDER &
FAIRPLAY EXPLORATION & WATER MANAGEMENT
REGISTRATION ID: 110768**

**ENVIRONMENTAL GROUP SITE NAME: GOLDEN MILE/NORTHERN
ENVIRONMENTAL GROUP SITES: S0236564 and S0236563**

I refer to your Mining Proposal received on the 4 May 2022, and revised on the 14 October 2022. The Mining Proposal has been assessed by the Department of Mines, Industry Regulation and Safety (DMIRS) and determined to be acceptable for approval under the *Mining Act 1978* (the Mining Act).

I hereby approve the Mining Proposal under the provisions of the Mining Act.

By signing this document I declare that I have no conflict of interest that prevents me from making a decision on this proposal, as outlined in the DMIRS Conflict of Interest Policy.

The mining activities and rehabilitation commitments made in this Mining Proposal and Mine Closure Plan (MCP) for Small Mining Operations should be incorporated into the site wide Mine Closure Plan upon its next revision. The site wide MCP is to be submitted in accordance with existing tenement conditions.

I advise that I intend to recommend the Minister for Mines and Petroleum's delegate impose further conditions on M26/60, M26/61, M26/131, M26/261, M26/353 and M26/383, as outlined in Schedule 1. Further correspondence will be sent from DMIRS once the conditions are imposed.

Important – Please note that you must submit a revised Mining Proposal for assessment and approval when a new activity, or change to an activity type, beyond that listed in the Mining Proposal is proposed.

This approval does not supersede any other applicable provisions of the Mining Act, or remove the need for any necessary approvals from other authorities. **This includes the requirement outlined under Section 20 of The Mining Act 1978 to obtain written consent prior to enacting the works within 100m of an occupied house.**

You are reminded that you are required to report disturbance data on an annual basis and pay any corresponding levy in accordance with the *Mining Rehabilitation Fund Act 2012* and associated Regulations.

Before work is to commence please be reminded of your obligation to carry out the mining operation in accordance with the provisions of the *Work Health and Safety Act 2020* and Work Health and Safety (Mines) Regulations 2022. Duties under this legislation require the mine operator to provide notice of commencement to the regulator for a mining operation, and to establish and implement a mines safety management system prior to the commencement of mining operations including construction. Further information can be found at www.commerce.wa.gov.au.

Further to this, if your proposal is clearing native vegetation a clearing permit under Part V Division 2 of the *Environmental Protection Act 1986* for clearing of native vegetation will be required unless a relevant exemption applies.

Please be reminded that the *Aboriginal Heritage Act 1972* protects all Aboriginal heritage sites in Western Australia, whether or not they have previously been identified or registered under that Act. Consent is required from the Minister for Aboriginal Affairs for any activity which will impact Aboriginal heritage sites. This approval in no way grants authority to impact any Aboriginal heritage site protected under the *Aboriginal Heritage Act 1972*.
