RE: Works Approval Application - Bundarra Gold Mining Project

Northern Star (Bundarra) Pty Ltd, a wholly owned subsidiary of Northern Star Resources Ltd (Northern Star), is seeking a Works Approval pursuant to Section 54 of the *Environmental Protection Act 1986* to support mining activities within its Bundarra gold mining project. Bundarra is located in the northeastern Goldfields region of Western Australia approximately 60 km north of Leonora.

Bundarra consists of several open pits, waste rock landforms, and other supporting infrastructure and was first mined in 2001. The site was in care and maintenance from mid-2000s until late 2023 when the Wonder Underground mine commenced operations. Bundarra is operated as a satellite mine supplying ore to Northern Star's nearby Thunderbox Operations.

This Works Approval application seeks approval for prescribed activities that include:

- **Category 5** - to construct a dry paste plant and associated tailings stockpiles area;
- **Category 6** - to construct dewatering pipeline infrastructure between several pits;
- **Category 12** - to undertake campaign mobile crushing & screening activities; and
- **Category 89** - to construct a putrescible landfill site within an existing waste rock landform.

Please find enclosed a completed Works Approval application form IR-F09, compiled supporting attachments and proposed prescribed premises shapefile. Should you require any further information to support this application please contact me via [REDACTED]

Yours sincerely,
