Date of Report	22/09/2025 (FINAL)
Proposed Decision	Revised licence granted

1. Decision summary

The Delegated Officer has determined to make amendments to Licence L4549/1982/12. The amendments are administrative in nature therefore they do not alter the risk profile of the Premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This Amendment Report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

The Decision Report for the Existing Licence will remain on the department's website for future reference and will act as a record of the department's decision making.

1.1 Regulatory framework

In amending the licence, the department has considered and given due regard to its Regulatory Framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

1.2 Amendment summary

Licence L4549/1982/12 is held by Holcim (Australia) (Licence Holder) for the premises known as Turner River Quarry (the Premises), located within multiple tenements in Boodarie, WA.

The Premises relates to the category and the assessed production/design capacity under Schedule 1 of the *Environmental Protection Regulations 1987* (EP Regulations) which is defined in existing Licence L4549/1982/12.

In July 2020, the Government announced a package of regulatory reforms to streamline approval processes and to aid economic recovery post COVID-19. With these reforms, the CEO implemented an administrative renewal process to fast-track the renewal of licences determined to be of lower risk. This work has reduced timeframes of assessments, however, the CEO proposed to streamline the process further. Where identified as being appropriate to action, the department is extending the duration of licences that are due to expire up to 30 June 2026 (amend to extend). This licence has been identified as a licence suitable to process as an administrative extension to the licence duration.

On 5 August 2025, the department initiated an amendment to Licence L4549/1982/12. The amendment is limited to (in summary):

- Updating the licence format;
- Extending the licence expiry date;
- Renumbering of conditions;
- Administrative changes;
- Removal of redundant conditions.

No reassessment of risk has been undertaken at this time.

2. Consultation

The Licence Holder was provided with the draft amended licence and draft amendment report on 5 September 2025. On 16 September 2025, the licence holder accepted the proposed amendments to the licence and waived the remaining comment period.

3. Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the Revised licence as part of the amendment process.

Table 1: Summary of licence amendments

Section/Condition/Schedule	Proposed amendments
Cover page	Updated to current standard format Updated registered business address Commencement date of 1 October 2013 removed. Licence duration extended to 18 September 2030.
