Premises	Red Sand Supplies Pty Ltd 192 Hope Valley Road HOPE VALLEY WA 6165 Legal description – Part of Lot 339 on Deposited Plan 245455 As defined by Schedule 1 attached to the Revised licence
Date of Report	10 February 2025
Decision	Revised licence granted

**SENIOR ENVIRONMENTAL OFFICER
INDUSTRY REGULATION**

an officer delegated under section 20 of the
Environmental Protection Act 1986 (WA)

1. Decision summary

The Delegated Officer has determined to make amendments to Licence L6544/1993/11. The amendments are administrative in nature therefore they do not alter the risk profile of the Premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This Amendment Report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

The decision report for the Existing licence will remain on the department's website for future reference and will act as a record of the department's decision making.

1.1 Regulatory framework

In amending the licence, the department has considered and given due regard to its Regulatory Framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

1.2 Amendment summary

Licence L6544/1993/11 is held by Red Sand Supplies Pty Ltd (licence holder) for the Red Sand Supplies Pty Ltd (the premises), located at 192 Hope Valley Road in Hope Valley.

The premises relates to the categories and the assessed production/design capacity under Schedule 1 of the *Environmental Protection Regulations 1987* (EP Regulations) which are defined in existing Licence L6544/1993/11.

The department considers there to be insufficient time to complete a licence renewal prior to the current licence expiry. Therefore, the licence duration will be extended for a short period to ensure the current licence continues to remain in force until a full assessment is able to be completed.

On 06/01/2025, the department initiated an amendment to Licence L6544/1993/11. The amendment is limited to extending the licence expiry date.

2. Consultation

The licence holder was provided with the draft licence and amendment report on 10 January 2025. Comments received from the licence holder on 31 January 2025 have been considered by the Delegated Officer as detailed in Appendix 1.

3. Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the Revised licence as part of the amendment process.

Table 1: Summary of licence amendments

Condition no.	Proposed amendments
Duration	Extended to 2/02/2027. Date adjusted to align with annual fee.
Licence History	Updated to note licence duration extension.

4. Conclusion

Based on this Amendment Report, the Delegated Officer has determined that an amended licence will be granted, subject to conditions commensurate with the determined controls and necessary for administration and reporting requirements.

From correspondence provided to the department on the 31 January 2025 between the licence holder and planning authorities, it is unclear if planning approval for the C&D waste recycling facility has been received. The licence holder should seek retrospective planning approval for the premises as soon as possible following the granting of the revised licence.

If planning approval is not obtained by the new licence expiry date of 2 February 2027, DWER may determine not to renew the licence further. If the licence holder determines to continue operating the premises without the necessary approvals from planning authorities, they do so at their own risk.

Appendix 1: Summary of licence holder's comments on draft amendment

Condition	Summary of Licence Holder's comment	Department's response
N/A	On 31 January 2025 the licence holder provided a copy of the application for an amendment of the existing groundwater licence to allow for dust suppression.	The Delegated Officer has confirmed the groundwater licence GWL50465(7) has been amended to reflect the use of groundwater for dust suppression.
N/A	On 31 January 2025 the licence holder provided a copy of correspondence between planning authorities relating to planning approval for C&D activities on the Lot.	The Delegated Officer has noted that the correspondence provided does not confirm that approval has been provided by planning authorities for the activities on the premises.
