Date of Report	6 November 2024
Decision	Revised licence granted

Melissa Chamberlain

**MANAGER WASTE INDUSTRIES
REGULATORY SERVICES**

an officer delegated under section 20 of the *Environmental Protection Act 1986* (WA)

1. Decision summary

The delegated officer has determined to make amendments to licence L7120/1997/12. The amendments are administrative in nature therefore they do not alter the risk profile of the premises, providing that activities, emissions and receptors as stated in existing approvals remain unchanged.

This amendment report documents the amendments made pursuant to section 59 and 59(B) of the *Environmental Protection Act 1986* (EP Act).

The decision report for the existing licence will remain on the department's website for future reference and will act as a record of the department's decision making.

1.1 Regulatory framework

In amending the licence, the department has considered and given due regard to its regulatory framework and relevant policy documents which are available at <https://dwer.wa.gov.au/regulatory-documents>.

1.2 Amendment summary

Licence L7120/1997/12 is held by the City of Busselton (licence holder) for the Rendezvous Road Waste Transfer Station (the premises), located at 39 Rendezvous Road, Vasse.

The premises relates to the categories and the assessed design capacity under Schedule 1 of the *Environmental Protection Regulations 1987* (EP Regulations) which are defined in existing Licence L7120/1997/12.

The department considers there to be insufficient time to complete a licence renewal prior to the current licence expiry. Therefore, the licence duration will be extended for a short period to ensure the current licence continues to remain in force until a full assessment is able to be completed.

On 8 October 2024, the department initiated an amendment to Licence L7120/1997/12. The amendment is limited to extending licence expiry date and amending typographical errors.

2. Consultation

The licence holder was provided with the draft amendment report on 8 October 2024. The licence holder responded on 1 November 2024 requesting the revised licence be granted.

3. Summary of amendments

Table 1 below provides a summary of the proposed amendments and will act as a record of implemented changes. All proposed changes have been incorporated into the Revised licence as part of the amendment process.

Table 1: Summary of licence amendments

Condition no.	Proposed amendments
All	Reference to 'licensee' replaced with 'licence holder'. Reference to 'shall' replaced with 'must'.
Cover page	DWER file number updated. Date of amendment added.

Condition no.	Proposed amendments
