Date(s) of noncompliance: Date(s) of noncompliance: The assessed production capacity of the Mindarra Piggery is no more than 65,000 pigs. What was the actual (or suspected) environmental impact of the non-compliance? NOTE – please attach maps or diagrams to provide insight into the precise location of where the noncompliance took place. The number of pigs at the Mindarra Piggery as at 30 June 2023 was: Animals 74,598, SPU: 82,228 Cause (or suspected cause) of non-compliance: The Licensee has consulted with DWER in relation to the exceedance of pig numbers and is in the process of completing a Works Approval Application. DWER has advised that the most streamlined approach is to completely reassess pig numbers as a part of the works approval (and associated licence amendment) process to ensure any risk assessment is conducted using the final, correct pig numbers (in SPU) and relevant infrastructure changes. This would provide a clean slate, avoid assessment duplication and reduce the administrative burden on the premises. Action taken to mitigate any adverse effects of non-compliance and prevent recurrence of the non-compliance An Application for a Works Approval has been completed, and Westpork is in the final stages of completion of the water balance modelling based on the revised SPU for the site. The submission of this application is imminent. Was this non-compliance previously reported to DWER? Yes, and	Details of non-compliance: The assessed production capacity of the Mindarra Piggery is no more than 65,000 pigs.
