Section F – Details of non-compliance with licence condition				
Please use a separate page for each condition with which the licence holder was non-compliant at a time during the reporting period.				
Condition number:	3, 10	Date(s) of non-compliance:	1 Jan 2022 to 1 Seր	otember 2022
Details of non-compli	ance:			
Moisture analyser MN-102 was not operational between 2 May 2021 and 1 September 2022.				
What was the actual (or suspected) er	nvironmental impact of the non-c	ompliance?	
There was no environmental impact associated with the failure to operate moisture analyser MN-102. All monitoring data from MN-101 was measured and recorded as per requirements in 2022. Dust suppression equipment listed under Condition 3 was operated as required during 2022.				
Cause (or suspected	cause) of non-co	ompliance:		
As part of the construction of the Ore Processing Facility (Works Approval W6284/2019/1), conveyor belt CV-102 was re-configured and MN-102 was decommissioned. Delay in commissioning a replacement unit of MN-102 was due to vendor site access issues from various state border closures. The MN-102 replacement unit was commissioned on 4 April 2022, however the calibration process ran until September 2022 due to the requirement for sampling and offsite lab analysis. MN-102 was fully calibrated and operating effectively from 1 September 2022.				
Action taken to mitigate any adverse effects of non-compliance and prevent recurrence of the non-compliance:				
There were no adverse effects associated with the non-compliance. The following actions have been taken to prevent recurrence: • Signage installed on all equipment required for compliance for clear identification in the field; and				
Update of project coordination scopes and procedures to include review of Part V Licence requirements.				
Was this non-compliance reported to the DWER?				
	WER verbally	Date:		⊠ No
☐ Reported to [WER in writing	Date:
