Section E – Details of non-compliance with licence condition			
Please use a separate page for each condition with which the licence holder was non-compliant at a time during the reporting period.			
Condition no:	Production capacity	Date(s) of non-compliance:	2024 Period
Details of non-compliance:			
The facility produced 22,063 tonnes of liveweight in 2024, hence exceeding their production capacity of 16,200 tonnes			
What was the actual (or suspected) environmental impact of the non-compliance? NOTE – please attach maps or diagrams to provide insight into the precise location of where the non-compliance took place.			
This exceedance did not result in emissions to land exceeding the emissions limits set out in the licence. In 2024, TN loading reached 128.15 kg/ha, well below the specified limit of 300 kg/ha. Similarly, TP loading stood at 38.01 kg/ha, within the defined threshold of 50 kg/ha. Additionally, BOD was recorded at 0.54 kg/ha/day, remaining comfortably below the limit of 30 kg/ha/day. Consequently, this non-compliance had no adverse impact on the environment.			
Cause (or suspected cause) of non-compliance:			
The exceedance of the production capacity can be attributed to an upsurge in processing numbers, a direct response to the escalating demand from emerging markets.			
Action taken to mitigate any adverse effects of non-compliance and prevent recurrence of the non-compliance:			
As noted in the previous AACR, HMP is planning to lodge a license amendment to double its production capacity, with the objective of managing the additional kills in a sustainable manner. To achieve this, liaison with consultants commenced in 2024. At this stage, we have yet to finalize a proposal with sufficient detail to present to DWER for a scoping meeting. Once the proposal is deemed robust, a scoping meeting will be organized to obtain DWER's initial feedback, which will also help guide the preparation of the application.
