Dear DWER Officer

Derby and Fitzroy Crossing Waste Management Facility Annual Environmental Report and Annual Audit Compliance Report

Fitzroy Crossing 01/01/2021- 31/12/2021

- There were no pollution control equipment failures in Fitzroy Crossing last year
 - There were no fires at the Fitzroy Crossing WMF
 - Dust suppression measures remain exactly as set out in last year, report
 - The control of windblown waste in Fitzroy Crossing remains exactly as set out in last year's report
 - There is no reason why the compaction rate of 300-400kg/cubic metre would have changed. There is no significant increase in volumes
 - No complaints were logged
 - Site boundaries have not changed during the year. They remain the same.
 - Only the Shire can run reports on Cooe. However, there would not have been an increase in asbestos waste deposited.
 - There is no Clinical Waste cell
 - Fitzroy Crossing does not accept liquid waste
 - Total volume of waste buried remains well below 10,000 tonnes.
 - Rejected loads are very much a thing of the past. Everybody knows that we do not have a hydrocarbon licence.
- 
- 

Derby 01/01/2021- 31/12/2021

- There were no pollution control equipment failures in Derby last year
- There were no fires at the Derby WMF
